

Presentation Title

Presentation Subtitle

Your Name

Villanova University

Slides Updated: 2025-04-23

Slide 1 title (tell us something about what we're about to see)

- Motivation
- Argument

Slide 2 title (maybe something with your data here to further motivate your analysis)

Slide 3 title

- Here you can either include more motivating plots OR your hypothesis; if you include your hypothesis, think about including your statistical model equation as well (generic example below)

$$\text{outcome}_i = \alpha + \beta_1(\text{main predictor})_i + \beta_2(\text{control var1})_i + \cdots + \epsilon_i$$

- i indicates the units (e.g., countries, elections, etc.)

Slide 4 title (show some initial results)

Slide 5 title (concluding thoughts/next steps)

- Layout your next steps:
 - 1 I need to look at the impact of a particular covariate/control, or add more controls
 - 2 Check residuals
 - 3 etc.
